

White-minus-Black veteran pay gap: raw

No position or quality controls

Model-implied gap using predicted race

White APY relative to Black APY
Percent, from log-pay contrast

Positive = higher White APY. Pointwise 95% CIs; SEs clustered by player.

Same 5,060 UFA/extension contracts in both plots. *2026 is incomplete.

Predicted-race and selection assumptions apply; not a causal effect.
